

How Would You Defend a Country 9 Miles Wide?

The Palestinian Strategy: Divide and Conquer

If the Arab demands made at the Annapolis Summit prevail, the map you see on the left will be the new configuration of Israel – dividing Israel in half to create a contiguous Palestinian State.

The miniscule state of Israel will then shrink dramatically making it indefensible against Arab aggression.

Israel will lose sovereignty over almost all of the Christian and Jewish Holy Sites.

Moreover, becoming militarily vulnerable Israel will eventually fall prey to Islamic aggressors who are determined to wipe the Jewish state off the map.
